PROJECTS

Store Rating Management System | [Link](#)

May 2026

Tech Stack: **React.js**, **Express.js**, **PostgreSQL**, **Tailwind CSS**, **JWT**, **bcrypt**

- Developed a **full-stack** Store Rating Management System that allows users to register, log in, and submit ratings for stores.
- Built a responsive frontend using **React.js**, **Vite**, **React Router**, **Tailwind CSS**, and **Axios**.
- Developed the backend using **Express.js** and **PostgreSQL (Neon DB)** for database management.
- Implemented backend **business logic**, **request validation**, and **database operations** for secure **data handling**.
- Designed and integrated 15+ **RESTful APIs** for seamless **frontend-backend** communication.

Career Search Application | [Link](#)

April 2026

Tech Stack: **React.js**, **JavaScript**, **Axios**, **RapidAPI**

- Developed a responsive Career Search web application for browsing job opportunities and related details.
- Integrated **RapidAPI** to fetch and display real-time job listings dynamically.
- Implemented **React Hooks** for efficient state and lifecycle management.
- Managed asynchronous **API** requests using **Axios** with proper error handling and conditional rendering.
- Improved user experience with responsive UI design and optimized component structure.

TODO List Application | [Link](#)

March 2026

Tech Stack: **HTML**, **CSS**, **JavaScript**, **Local Storage**

- Developed a responsive TODO List application for task creation, updating, and deletion.
- Implemented **browser Local Storage** to maintain task persistence after page refresh or browser closure.
- Applied **JavaScript** DOM manipulation and event handling for dynamic task management functionality.
- Strengthened understanding of browser storage concepts and **frontend development** fundamentals.
